

# HOW TO SETUP TAILWIND CSS

Step 1 : Run the following commands

```
npm install -D tailwindcss  
npx tailwindcss init
```

Step 2 : Update tailwind.config.js file to include this line

```
content : ["*.html"],
```

Step 3 : Create src/input.css to include:

```
@tailwind base;  
@tailwind component;  
@tailwind utilities;
```

Step 4 : Include the src/output.css file to your html

Step 5 : Run the following command:

```
npx tailwindcss -i ./src/input.css -o ./src/output.css --watch
```
